# UNIVERSITY OF SASKATCHEWAN

## SASKATOON, CANADA

The University is situated on the east side of the south branch of the Saskatchewan river, opposite to the City of Saskatoon. Its site comprises 1,582 acres. About 293 acres, with a frontage of over half a mile on the river, have been set apart for a campus. A portion of the quarter-section south of the campus is devoted to plot work.

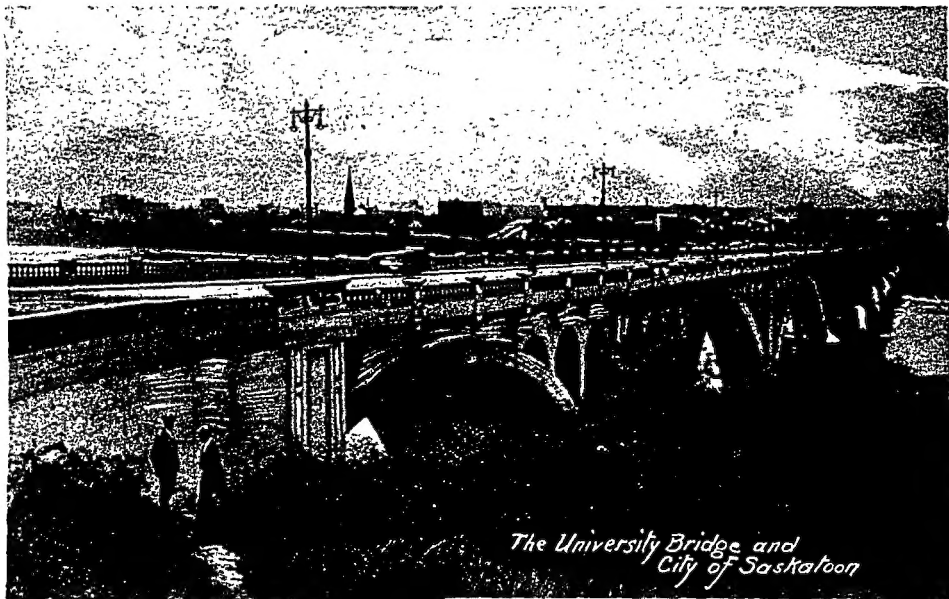

The College building is used for teaching purposes in Arts and Agriculture. It is located in a position convenient to the Agricultural Engineering, the proposed Horticultural and Dairy Buildings, the Stock Pavilion and Farm Buildings—so that in time it may be devoted exclusively to the College of Agriculture. Near it are placed the Greenhouses, the Anatomy and Physiology Laboratories, the Physics, the Biology, the Chemistry Laboratories, and the Residences Saskatchewan and Qu-Appelle Halls, providing accommodation for about two hundred and fifty students. The Library and the Laboratories for Bacteriology and Dairying are at present housed in the College Building. An Arts building is to be erected.

The Laboratory for Engineering, originally large, has been added to during the past year, and includes machine, forge and woodworking shops. One portion of it is at present devoted to the Department of Field Husbandry.

The Power House is designed to heat, light and supply power for all buildings to be erected now and for several years hereafter. The plans will permit expansion at small cost.
